

Detente Print-and-Play Quickstart

Use this checklist after printing the rulebook, cards, and resource bills.

Files included

- detente-rulebook-updated.pdf - full updated rulebook with Policy card rules and table
- detente-cards-updated.pdf - Country Type cards, Goal cards, and Policy cards
- detente-resource-bills.pdf - printable resource bills
- Optional: bundle the three PDFs into a ZIP for distribution

Printing

- Print the cards on cardstock if possible. If using normal paper, sleeve the cards with a spare playing card behind each printout.
- Print resource bills on normal paper. Print multiple copies if you want a larger central bank.
- Cut along the card borders. Keep Goal cards face-down during setup.
- Country Type cards are dealt face-down and may be kept private unless your table wants them public.
- Policy cards should be shuffled into a face-down center deck before play.

Setup reminder

- Deal one Country Type card and one Goal card to each player.
- Give each player the starting resource values listed on their Country Type card. Each player starts with 50 total resource value, not 50 of each resource.
- Place the remaining Goal cards face-down and unused in the center.
- Shuffle the Policy cards into a face-down deck. Players may buy the top Policy card as their action.
- Use the central bank for all payments, trades, and policy income.

What changed in Version 2.1

- Policy cards are now fully defined and included in the cards PDF.
- The duplicated Country Type table under the old Policy section has been replaced.
- The rulebook now correctly says there are three turn actions: make a deal, buy one Policy, or make a guess.
- Starting resources have been corrected to 50 total resource value per player, determined by Country Type card.
- Goal checks now clarify that players count resource value, not the number of paper bills.
